Subject: Fwd: short term rental article REBUTTAL

All,

I am Putting these "good neighbors", the council and mayor on notice. Further harassment of a pool of owners that quite frankly have resided here years longer than any of the complainants that a full on legal action is headed your way. I am going to assert every legal resource at my disposal and YES I have a ton of them, to fight this cause on behalf of all the rental property owners. Action by the council, the mayor and Any citizen fighting against our rental property rights will be dealt with swiftly and without any restrain for full civil and criminal action. We as a group have had enough and I dare you test the financial capabilities of myself alone or those of my counterparts renting their houses. I assure you that I will spend every financial resource possible to thwart Each and every one of those forging forward with complaints and I will be going after the township and its council for unjustified harassment of our group of owners. We have rights and we should not be treated differently then any single other owner. You have unleashed my fury at this point.

We made considerable efforts to appease and Those who complain do not wish to restrain themselves. They have made this a vendetta and trust me, my pockets are deep enough to keep each and Every one of you tied up in court for the Rest of your tenure in point venture. So let's put the good neighbor bit aside. I now consider this out Right war and I am going to fight to the death of this cause. Good writtens and good luck as you will all need it.

Mayor cecala, it is your responsibility to put to bed these efforts of just a few citizens which at this point are crying wolf. Please take action to let them know the council will not be taking up this issue again. I will take action on your office and the council if this matter is not squashed and put to bed. Its now

become a nuisance to the rest of the community by just a few complainants. This is ridiculous. You take action or this city and its council will find itself in court fighting a group of citizens that have rights and should not be harassed on a weekly basis.

And Janice please your barking dog inside before I begin calling the town animal control daily as its barks all day long out front of your house. I've dealt with it for years and now I will just start enforcing the laws that are already in place for noise nuisance by animals.

You all have now turned this to an adversarial relationship a I am not one you want to have on the other side. It is about to get nasty and Janice I can get a whole lot nastier than you. V
